Week 12 Assignment

HTML Test & Access Introduction to Databases and Database Objects

General Notes:

- **This week you will take the HTML Test.** The test is having 100 multiple-choice questions. You need to finish it in 100 minutes. You can take the test only once. This means you MUST study all what you have learned in the last four weeks before you start the test.
- **Also, this week you will start learning about the last application, which is Access.** Access is a database application.
- **Remember that all the requirements for this week’s assignment should be submitted before the deadline on Sunday 11:55 pm.**
- Before you complete each of the following exercises, print this assignment page out and use it to keep notes about your progress. When you are done with each exercise, "check it off" on the list.
- Download **Unit 10 Rubric** file to see how your assignment will be graded.
- Check the assignment naming convention listed in Unit 01 assignment.
- **You will have two different kinds of assignments:**
  - **SAM activities:** You will submit those activities through the SAM environment. You will be graded after the deadline.
  - **Canvas activities:** You will work on those activities through the Canvas environment.
    - If you need extra credit points, participate in the discussions.
    - There are no attachments needed for this week through Canvas.
  - The final score for each assignment will be posted in the grade book in Canvas.

Part 1 – Readings / Study

- Read the Chapter 1 of the Access book (**AC01: Databases and Database Objects: An introduction**).

Part 2 – SAM & Canvas Activities

You will do the following activities:

- **AC1: Creating a Worksheet and a Chart**
  - 12a - AC2016 Training - Ch01 (Up to 10 points)
  - 12b - AC2016 Exam - Ch01 (Up to 20 points – This week the Exam is for double the points than usual.)
  - 12c - AC2016 Project - Ch01 (Up to 20 points)

- **HTML Test** *(Must be submitted through Canvas, Not through SAM)*
  - 12d - HTML Test (Up to 100 points, counted separately)

Part 3 - Discussions

Don’t forget that you need to post at least 5 meaningful discussion messages. You will get up to 5 points towards extra credit. Your message could be a question about something that you did not understand in the week’s activities, an answer to a question posted by another class mate, or some
useful hints that you would like to share with the rest of the class. Make sure that you write your discussion message in the right week, in a clear English language, with proper punctuations, and correct spelling.
